

# NATURAL KNOWLEDGE- BASED SOLUTION

Product brochure

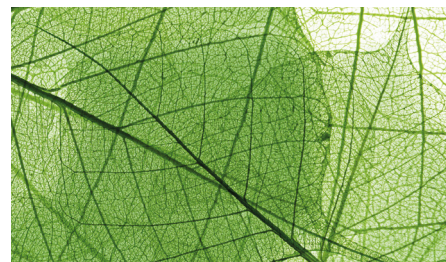

ART

At VET-ANIMAL, we believe the strength of modern beekeeping lies in smart, effective and safe solutions — those that unite nature with proven knowledge. That's why our products are created in close cooperation with beekeepers, combining research with the real needs of apiaries rather than marketing claims. We develop products that respond to the issues you report in your bee colonies.

We focus on innovative solutions in close cooperation with scientists to provide you with tools that will support you in your daily work to improve the health status of bee colonies. Our mission — “Natural knowledge-based solutions” — drives continuous improvement, active listening, and delivering solutions that truly work in the field.

In this catalogue, you'll discover our range of products and straightforward advice for everyday use. Each product is the result of a dialogue between science and experience, between the laboratory and the hive. We invite you to meet our team — we'll be happy to discuss how we can strengthen bee health and well-being, step by step, season by season.

# WE HAVE MANY YEARS OF EXPERIENCE WE ARE COMMITTED TO CONTINUOUS DEVELOPMENT

PRODUCT CATALOG FOR BEES

- We provide high-quality natural preventive and therapeutic products for niche groups of animals in the veterinary industry.

For years, we have been involved in research projects aimed at developing the highest quality products using the knowledge and experience of Polish scientists. Our status as a pharmaceutical

wholesaler of veterinary medicinal products requires a high level of service quality, rigorous compliance with applicable legal regulations, and the application of internal operating procedures.

> QUALITY

> EFFICIENCY

> EFFECTIVENESS

> TRUST

- > VET-ANIMAL is a brand that has gained recognition on the market thanks to the quality, effectiveness, and affordability of its products. Thanks to innovative solutions, we help raise the health status of bee colonies to a higher level.

The products we offer are a response to the specific needs of bees in the current global context. Understanding these needs allows us, together with scientists, to create products that are carefully considered and tested, ensuring their

effectiveness and safety. Our approach to research is based on the constant search for new, effective solutions. We collaborate with research centers and veterinary specialists.

> MODERN  
SOLUTIONS

> AFFORDABLE  
PRICE

> KNOWLEDGE

- > We are proud that our products are gaining recognition in European markets. By exporting our products, we confirm the trust our customers place in us. This motivates us to continue developing and constantly expanding our boundaries.

# BEE HEALTH CENTER®

- We have established Bee Health Center® initiative, a platform that brings together scientists, laboratories, research institutes, and the bee health experts, veterinary medicine, apiary management, biology, and legislation.

## WE BRING TOGETHER SPECIALISTS, BEEKEEPERS, VETERINARIANS AND INSTITUTES.

The initiative aims to advance veterinary care in the beekeeping sector and support beekeepers in improving the health of their colonies. It also involves partner veterinary practices, operating as branches of Bee Health Center® and run by specialists.

# EDUCATION

At VET-ANIMAL, education is an integral part of our mission. We see ourselves not only as a company that provides innovative products, but also as a trusted partner supporting veterinarians and animal health professionals with up-to-date knowledge.

We regularly organize conferences, workshops, and training sessions for veterinarians, breeders, veterinary authorities, and animal health associations. These events create space to exchange experience, address current

challenges, and share the latest developments in animal health, nutrition, and apiary management.

Our lectures are delivered by experienced veterinarians, specialists in disease prevention and animal nutrition, as well as VET-ANIMAL experts. The goal is simple: to strengthen professional knowledge, provide practical tools for daily work, and build lasting partnerships based on dialogue and trust.

A photograph of two men shaking hands at a trade show booth. The man on the left is wearing glasses and a dark blazer over a light shirt, smiling. The man on the right is seen from the back, wearing a dark jacket. In the background, a yellow banner features the text 'NATURALNE ROZWIĄZANIA DLA PARTNERÓW WIEDZY' and 'VET-ANIMAL'. To the left, a small table holds various products. To the right, a rack displays brochures, one of which has the title 'NATURALNE ROZWIĄZANIA DLA PARTNERÓW WIEDZY'.

WE CREATE SPACE  
TO SHARE,  
THE KNOWLEDGE  
AND EXPERIENCE.

# BEE HEALTH CENTER® PRODUCTS

## > Why do bees need our support?

Bees are fascinating animals!

They have always been present in our families. But their needs are changing dynamically due to problems that have arisen in beekeeping: diseases (which were not previously present), climate change (droughts, pollen shortages), intensification of production, and the use of chemicals in agriculture.

Bees sometimes require human involvement, also in providing of supplements and medicinal products.

The Bee Health Center® offers high quality products well-balanced specially for bees and for its special needs. The products were developed in response to problems that beekeepers face in the apiaries.

Close cooperation with scientists and the bee health experts was crucial in this process.

We offer our clients professional assistance and advice on maintaining high health status in their apiaries.

AMINO-VET				ESSENTIAL AMINO ACIDS AND VITAMINS FOR BEES - POLLEN SUBSTITUTE
<b>RECOMMENDED IN SPRING</b> <ul style="list-style-type: none"><li>• in the absence of bee bread and pollen,</li><li>• to stimulate brood production,</li><li>• to strengthen bee colonies.</li></ul>				<b>RECOMMENDED IN AUTUMN</b> <ul style="list-style-type: none"><li>• as a strengthening</li><li>• and prebiotic effect,</li><li>• to protect colonies for overwintering.</li></ul>
<p>The combination of the individual ingredients acts as a bio-stimulator; when administered in sugar syrup or sugar cake, it has a beneficial effect on the colony.</p> <p>Applied in the period of low availability of pollen or insufficient quantity of bee bread (e.g. in spring), it stimulates the bee colony to the expected growth of the population (effective brood development by the queen) and strengthens bee colonies.</p>				<p>Feeding the product in syrup or cake compensates the insufficient levels of amino acids (proteins), vitamins and has a prebiotic action. The product should also be administered between honey harvests or during the period of colony mating and preparation for overwintering.</p> <p>Complementary feed for bees in liquid.</p>
	200 ml	500 ml	2 l	<b>EFFICIENCY:</b> 200 ml - up to 40 liters of syrup 500 ml - up to 100 liters of syrup 2 l - up to 400 liters of syrup

# CALM-VET

The product has been developed for those beekeepers who want to avoid, or for health reasons should avoid, smoke from burning wood decay or certain plants.

It is also an excellent method when several apiaries need to be visited in one day or for apiaries located in the forest. CALM-VET is an eco-friendly alternative to traditional smokers and a way to neutralise odours in the hive environment without affecting the health of the beekeeper or the bees.

## CONTROLLED CALMNESS OF BEES

CALM-VET provides an eco-friendly way to calm a bee colony and equalise the odour in the beehive environment. Applying herbal essential oils affects the bees' sense of smell. This reaction lasts for more than 10 minutes, a period perfect to complete a planned inspection, after which everything goes back to normal.

Complementary feed for bees in liquid.

200 ml

### EFFICIENCY:

200 ml - per 66 litres of water

# HERBEE-VET

Stimulates the feeders and strengthens the bee colonies.

HERBEE-VET contains herbal extracts that support the stimulation of the pharyngeal glands and strengthen the honeybee organism.

In spring, with adequate availability of protein in the diet, the use of HERBEE-VET has a positive effect on the secretion of royal jelly, which is very important during this period for the proper development of the honeybee colony.

When administered in late summer, it has a strengthening effect on the young generation of bees in the colony.

## HERBAL STIMULATOR

When added to sugar syrup, it noticeably neutralises its smell, which can be helpful and reduce robbery.

Complementary feed for bees in liquid.

125 ml

1 l

5 l

### EFFICIENCY:

- 125 ml - up to 12,5 litres of syrup
- 1 l - up to 100 litres of syrup
- 5 l - up to 500 litres of syrup

## MULTIPRO-VET

Recommended for improving digestion in the digestive tract of bees and sanitising the hive environment. MULTIPRO-VET supplements deficiencies in the digestive system, boosting natural immunity.

Excellent for administration in drinking troughs, recommended for use in sugar or invert syrups and after each treatment of bee colonies (after antibiotic therapy – combating bacterial infections, after treatments to combat *V. destructor*, after treatment of fungal infections or disinfection).

## COMPLEMENTS DEFICIENCIES

This natural product does not contain genetically modified substances.

Complementary feed for bees in liquid.

200 ml

**EFFICIENCY:**  
up to 66 l of syrup

# NOSI-VET®

Use with selected sanitary-breeding procedure to strengthen the vitality and resistance of bee colonies against fungal diseases and nosemosis caused by *Nosema apis* and *Nosema ceranae*. The NOSI-VET® ingredients support the functioning of midgut of the honeybee.

Developed thanks to a research project involving scientists.

The product is suitable for administration in a feeder, for fogging and for pouring into the spaces between frames.

Complementary feed for bees in liquid.

## VITALITY IN SPRING AND CALM OVERWINTERING WITHOUT NOSEMA AND FUNGUS

The product was developed thanks to the support of a research project run by the Ministry of Economy through PARP.

200 ml

500 ml

### EFFICIENCY:

200 ml to prepare 66 litres of syrup  
500 ml to prepare 166 litres of syrup

# PROTI-VET

The pure protein isolates contained in PROTI-VET are high quality assimilable protein that ideally supplements the lack of protein in the bees' diet. The product does not contain soya protein. For use in sugar syrup, in honey-and-sugar feeding cake or in its pure form.

Does not put a strain on the digestive system.

Powdered complementary feed for bees.

500 g

4 kg

## NATURAL PROTEIN FOR BEES

### When to use?

**IN SPRING** – in order to quickly bring the colony into excellent condition (depending on technical possibilities, give in syrup or in cake, or gently sprinkle the uncapped frames with food).

**DURING THE SEASON** – in the absence of pollen to stimulate brood, prolong the life of the worker bees and strengthen the immune system (nutritional prevention to strengthen the colony against bacterial, viral, fungal infections).

**IN AUTUMN** – to prepare colonies for overwintering, administer in several portions so that the bees build up reserves to be consumed in early spring, ensuring the expected development at the start of the new season.

### EFFICIENCY:

500 g to prepare 50 l of syrup  
4 kg to prepare 400 l of syrup

# SILVECO+ BEE

Proven bactericidal, virucidal, fungicidal efficacy.

High-quality professional fungicide: *Ascosphaera apis*, *Aspergillus spp*, *Paenibacillus larvae* and viruses\*.

- Tests-confirmed bactericidal, virucidal and fungicidal efficacy.
- Can be used in the presence of animals.
- Product based on nanotechnology.

\*Tests confirming effectiveness carried out in accredited laboratories of ZHW Katowice, ZHW Kielce.

500 ml

2 l

## PROFESSIONAL BIOCIDAL PRODUCT

The product in the form of a concentrate is approved for use in the veterinary area to maintain well-being at an appropriate level, as well as in the food area to maintain food hygiene.

This innovative product contains active forms of silver. Use the product only in diluted form. Before use, read the instructions enclosed with the packaging.

Distribution of the product requires a marketing authorisation based on the regulations in force in the country concerned.

### EFFICIENCY:

500 ml to prepare 5 to 20 litres of working solution depending on the pathogen identified and the application protocol

2 l to prepare 20 to 80 litres of working solution depending on the pathogen identified and the application protocol

# WAX-VET

WAX-VET protects hive frames during storage. Protects the integrity of wooden frames with wax comb. Reduces the risk of mould on the combs.

The nettle extract (bioinsecticide) contained in the product, as a complex of natural plant-based substances, is safe for humans and the environment, which distinguishes it from synthetic pesticides.

## PROTECTION OF HIVE FRAMES DURING STORAGE

The unique formula of the product, combining a fermented group of *Bacillus spp.* spray-dried in combination with standardised nettle extract (*Urtica dioica L.*), guarantees effectiveness and long-lasting action.

The product is not intended for use in the presence of bees. Use as a spray after honey harvest and before storing frames.

Powder formula for preparing a solution with non-chlorinated water for spraying beehive frames.

Care product for beehive frames.

200 g

500 g

### EFFICIENCY:

200 g per 2 liters of non-chlorinated water  
500 g per 5 liters of non-chlorinated water
